Summary of Communication:

- A dive survey was done. There is a VHS available. It was done just to see what was on the bottom of the beach. NO red flags, just found a refrigerator and remnants of a boat.
- A formal survey was done of the beach. It is available in full size but she will get us a smaller copy.
- She did notice a sheen coming off of the KED.
- The tanks that are called submarine pontoons are not submarine pontoons. They did contain hydrocarbons at one time. They stuck an air monitor inside one of the tanks and had high hits.
